PROFESSIONAL EXPERIENCE

Michelin

New York City, NY – Greenville, SC

Key Account Manager – B2C WDA Sales (NY/NJ)

August 2026 – Present

- Manage and develop client relationships across a defined New York and New Jersey territory, supporting wholesale distributors of varying sizes and business models while driving consistent growth within Michelin's WDA channel.
- Identify growth opportunities by understanding each account's business needs and market position, communicating Michelin's product value, and building trust-based partnerships that drive consistent sell-through across the channel.
- Build a strong market presence through consistent, regular client engagement, expanding existing account relationships while actively developing new business and strategically growing Michelin's overall footprint across the territory.

Data Analyst – Logistics Pipeline

January 2026 – August 2026

- Built a logistics diversion tracking system in Python on Databricks with a Power BI dashboard benchmarked against historical costs and CO₂ targets, surfacing actionable insights that drove cost reduction and improved performance.
- Co-led a recurring 50+ person cross-functional meeting aligning service centers, distribution centers, and logistics teams on shared priorities and service targets, while compiling and presenting key metrics for executive review.
- Planned and executed a full-day, department-wide supply chain and logistics conference, managing the complete end-to-end event from budget and vendor coordination to stakeholder alignment and successful day-of execution.

Logistics Data Analyst Intern

May 2025 – January 2026

- Led the development of a standardized, AI-enhanced tire stacking solution to significantly improve warehouse space utilization across the entire North American logistics network, driving operational efficiency and cost savings.
- Reverse-engineered and refined an underutilized pallet stacking formula to accurately incorporate complex, real-world warehouse constraints, improving overall accuracy, efficiency, practicality, and long-term scalability.
- Integrated the innovative solution into a dynamic Power BI dashboard backed by SQL-managed data, validating through site visits and close collaboration with warehouse teams, ensuring successful adoption and continuous improvement.

Logistics Data Analyst Intern

May 2024 – August 2024

- Executed data-driven logistics optimization projects using SQL, Power BI, Azure Data Lake, and Databricks to significantly improve tire aging, inventory rotation, and transportation decisions for enhanced operational performance.
- Designed and implemented advanced dashboards and analytics models that reduced environmental impact by minimizing costly diversions and associated transportation emissions, supporting sustainability goals effectively.
- Translated large, complex datasets into actionable insights, enabling cross-functional teams to make faster, more informed decisions that improved service reliability, operational efficiency, and overall business outcomes.

University of South Carolina

Columbia, SC

Resident Assistant

April 2023 – December 2025

- Fostered a safe, inclusive, and welcoming residential community by actively promoting inclusion initiatives, creating a supportive and thriving environment that celebrates and welcomes a number of various backgrounds and perspectives.
- Built strong relationships with residents by proactively addressing concerns, supporting mental health and well-being, and encouraging participation in community programs and initiatives to provide a lasting positive impact.
- Served as a peer leader during junior and senior years, mentoring and training new and returning RAs to uphold community-building values and foster a positive living environment through effective communication and support.

Harris Teeter

Virginia Beach, VA

Front End Supervisor

December 2021 – May 2024

- Supervised front-end operations by managing staff scheduling, training, and performance to ensure efficient workflows, boost team morale, and deliver excellent customer service consistently with a focus on accuracy and professionalism.
- Oversaw financial processes including cash handling, check processing, and money order issuance with strict accuracy to maintain regulatory compliance, prevent errors, and safeguard financial integrity across daily operations.
- Acted as the primary point of contact for resolving customer concerns, fostering positive relationships, enhancing customer satisfaction, and consistently upholding the store's high service standards through effective communication.

EDUCATION

The University of South Carolina, Molinaroli College of Engineering and Computing

December 2025

Major: Integrated Information Technology | Minors: Computer Science, Cybersecurity Operations

GPA: 3.94

Relevant Coursework: Accounting, Database Management, Project Management, Networking & Security, Discrete Math

Awards: President's List (Multiple Recipient), Duane and Mary Meyer Scholarship, Engineering & Computing Scholarship

OTHER

Skills: Sales & Territory Management, Account Management, Project Management, AI, Power BI, Databricks, Microsoft Suite
